

- A. Write a program to input length and breadth of rectangle and find area and perimeter using function.
- B. Write a program to input any two number and calculate sum, difference, product and quotient using a function.
- C. Write a program to input any number and check whether the input number is divisible by two and three or not using a function.
- D. Write a program to input any three number and find the smallest, middle and largest number among them.
- E. Write a program to display all the numbers divisible by 2 and 3 between 1 to 100 using the function.
- F. Write a program to input any two number and find HCF and LCM using function
- G. Write a program to input any number and check whether the input number is prime or composite using a function.
- H. Write a program to display the multiple table of a given number using a function.
- I. Write a program to input any number and print it in reverse order using a function.
- J. Write a program to find the sum of numbers from 1 to 100 using a function.
- K. Write a program to print the series 1, 8, 27,..., 1000
- L. Write a program to print the series 1, 22, 333, 4444, 55555.
- M. Write a program to print the series 1, 30, 500, 7000, 90000.
- N. Write a program to print the series 2, 3, 5, 8,..... upto 10th terms with its.
- O. Write a program to find the factorial of a number using recursive function with of pointer
- P. Write a program to find the Fibonacci Series of a number using recursive function

- Q. Write a program to input any 10 number and print only even numbers from them using function and array.
- R. Write a program to input any 10 number and print the largest number from them using function and array.
- S. Write a program to input any 10 number and arrange them in ascending order using function and array.
- T. Write a program to print transpose of matrices (2x2) using function and array.
- U. Write a program to find sum of two matrices (2 x2) using function and array.
- V. Write a program to input roll number, name, age and gender of 10 students and display them using structure.
- W. Write a program to input bed number, patient name, address, age and disease name of 10 students and display them using structure.
- X. Write a program to input roll number, name, age and gender of 10 students and display them in ascending order on the basis of roll number.
- Y. Write a program to swap two number using pointer.
- Z. Write a program to input any 20 numbers and arrange them in ascending order using a pointer.
- AA. Write a program to input any 25 numbers and search the number entered by the user using pointer.
- BB. Write a program to enter data related to staff such as id, name, age, post and salary of 10 staff and display them.
- CC. Write a program to keep a record of books in the library such as book name on the basis of book name.
- DD. Write a program to enter the roll number, name, age and gender of a few students. The user can enter data as their wish.
- EE. Write a program to keep a record of book in the library and search book names on the basis of book name.
